# 1. System Product Order Codes

## 1.1 Product Descriptions – Overview

System products based on the Intel® Server Board S1600JP are offered in a variety of options to provide the most flexibility and I/O capability for customers.

Integrated systems include drive carriers and power supplies for a specific configuration.

The Intel® Server Board S1600JP is only offered in bulk 10-packs outside of configured systems.

## 1.2 Summary Chart

For a quick overview, all configuration options are summarized in the chart below. Reference details below in this document for MM numbers, configuration details, and product order codes.

Intel® Server Chassis and Systems shipped to the US & Canada contain North American power cords. North American customers no longer need to order skus ending in “NA” to receive power cords on these products.
